                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Wing, R., Close, T.J., Kleinhofs, A., Wise, R., Begum, D., Perisch, D., Yu. F., Herry, P. Paleer, R., Sambort, S. Simons, J., Chbi, D. W., Fenron, J., Oetes, R. and Main, D.
Deviciopene for a genetically and physically anchored SST resource for bariety general sinorex drought-attessed seedling shoot chan.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Fenton). Phagemids were plated and picked at the Clemson
University Genomics Institute (CUGI) (Abgum, Palmer.
Tatsch, Atkins and Wing). Plasmid DNA preparations, DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 sequencing and sequence analysis were performed at CVCI (Ming) 1. The Sequence have seen seen seen as well as the sequence and contains a minimum of 100 bases of pined value 20 or above. Por more details on library preparation and above.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    /clone_lib="Nordeum vulgare seedling shoot EST library
